

SIXTEENTH ROUND OF FUNDING AVAILABLE FOR STATE OF NEVADA LAKE TAHOE WATER QUALITY AND EROSION CONTROL GRANTS

LAKE TAHOE, Nevada – December 20, 2012 - The Nevada Division of State Lands announces the opening of the sixteenth round of grants for projects to be funded through the Lake Tahoe Water Quality and Erosion Control Grants Program. The sixteenth round will make funding available to implement Environmental Improvement Program (EIP) projects on the Nevada side of the Lake Tahoe Basin. This includes water quality and stream environment zone (SEZ) restoration and enhancement projects. Non-state applicants must provide a minimum twenty-five percent matching funds. The pre-application period will be from December 20, 2012 until January 11, 2013 at 5:00pm. **Pre applications are due in the NDSL office by 5pm on January 11, 2013.** Eligible projects will then be invited in writing to submit a full application which will be due on February 15, 2013. **The full application has been updated this year and will not be available until January 2, 2013.** These grants are not open to California agencies or residents.

In order to be eligible, projects must be identified in the current Environmental Improvement Program, be a benefit to the general public, and if the project includes the treatment of stormwater, the stormwater must be shown to be connected to a surface water body.

To download a pre-application form, please go to the NDSL website at <http://lands.nv.gov/program/tahoe.htm>.

For additional information or to submit your pre-application please contact:
